

Make a Mini Glue Suit – just like Matty’s!

Print this page. Place a sheet of wax paper over it. Spread a thick layer of glue on the wax paper, staying inside the lines of the ‘suit.’ Stick on lots of small objects (sequins, string, pompoms, raw noodles, googly eyes, glitter, scraps of colored paper) in a pattern or any which way. Leave the project in a safe place until it is completely dry (might be 2-3 days). Then peel the ‘suit’ off the wax paper, being careful not to tear it. Glue a magnet on the back and hang it on your fridge.

A mini glue suit on the author’s mom’s fridge
