

Hand Print Flowers

What You Need:

White paper plates
Colored construction paper
a pencil
Scissors
Glue Stick

How To Make Them:

1. Trace your hand on the construction paper. Use lots of different colors or select a simple color scheme of just a few colors. You can trace your mom's or dad's hand too!
2. Cut out the hand tracings
3. Starting from the outside of the plate, glue on the handprints, with palms pointing in, so that the fingers become the flower's petals.
4. Once you've gone around the plate once, start another circle of handprints, with the fingers overlapping the palms of the first circle. Keep going until you've come to the center of the plate.
5. Cut out a small circle of construction paper and glue it to the middle of plate.
