

# Make Your Own Monster Instructions

## Make Monster's Body

Place hand flat in the middle of the blank part of this page, with fingers all touching each other, and thumb close to the hand. Trace loosely around child's hand. Remove hand and join the lines at the bottom. This is the body.

## Make Monster's Parts

Monsters can have 6 eyes, 2 noses or no nose, and any number of arms and legs. Choose the parts you want to use from the Monster Parts page. Color the parts, then cut them out. Glue the parts to your monster's body. Use as many parts as you want, and glue them anywhere you want. You can color the monster's body, too!

## Now the Monster is Yours!

Give your monster a name, take it home, and put it under your bed.

My name is \_\_\_\_\_.
