

Mole in a Hole Craft

Make your very own mole who can pop into his hole to hide.

You will need:

- 1 paper cup
- 1 wooden craft stick or paper straw
- brown, green, and light pink construction paper
- 1 googly eye
- tape
- glue
- pencil
- scissors
- template (on page 2)

Instructions:

Print the template. Cut out the shapes on the printed template. Place the shapes on the construction paper, then outline and cut them out as described on the template (4 paws, 1 nose, 1 mole, 2 strips of grass).

Mole:

Glue paws, nose, and googly eye in place on mole shape. Let mole dry while you prepare the "hole" (cup).

Hole:

Cut a hole in the center of the bottom of the cup, just the size of your straw or wooden craft stick.

Tape the grass strips around the cup, top strip first, as shown in the photos.

When the mole is dry, tape the stick or straw securely to the back of the mole.

Insert stick or straw through hole. Push and pull stick or straw to make mole go up and down.
